

CONVERT YOUR PLAYGROUND INTO A SMART PLAYGROUND

Biba is a mobile game system that blends the digital play that children love with active outdoor play whilst capturing a cloud of data.

Order (Discounted price)

Biba kits will come with one welcome sign, six Biba markers and installation instructions.

£1,110 (inc delivery)

Installation Price £450
Excludes VAT

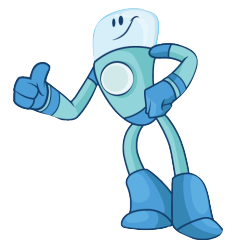

Install (Easy to Install)

Installation instructions will indicate which tags are to be installed on which equipment type such as swings, slides, bridges and tunnels. Biba markers and welcome signs have a 15 year warranty and can easily be installed onto all play equipment.

Play (Increases playground use)

Rather than trying to replace video games, Biba leverages them to get children the active, physical and imaginative play they need. The team at Biba have created a suite of augmented reality, imagination-driven playground games for parents to play with their children.

Available on both iTunes and Google Play.

Collect (Provides data to base decisions on)

Biba's patented technology gives us a unique ability to generate real-time, data-driven insights around playground ecosystems.

There is no such data available to community planners and it can be profoundly valuable for decisions of all magnitudes.
